## OPINION: SHOULD SCHOOLS OPEN?

*Should Schools Open? Raffle For Vintro's Club Members Included!*

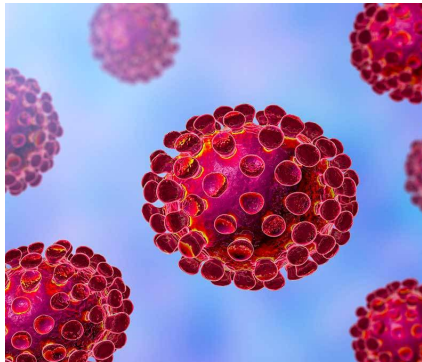

What do you think? Should schools open or no? We think they shouldn't, and here is why.

One thing which people still don't know much about is how much will kids get sick, but we think that they don't get sick as heavily as adults. If this is true, than that means kids can carry the virus around without even realizing it and spread it EVERYWHERE. Also, did I mention kids (especially the smaller ones) like to hug a lot? this is just great for the virus! But not for us.

The previous paragraph states that at school, if one kid gets sick, he goes and talks to his/her freinds, says hi to the teachers, and then, 2 weeks pass, and POOF: everyone is sick. The next day: POOF, more people. This will continue.

This is why we think schools should NOT yet open.

So what do you think? Email us at [vintro@vintros.net](mailto:vintro@vintros.net) with your claim, and give at least one reason. Please provide your name and email. Vintro's Club members will also enter a raffle to have a chance to win a free painting!

# NOW HIRING: REPORTERS

We are still looking for reporters. We have started recycling articles until we get more reporters!

Vintro's is on the lookout for more reporters. The reporters should not worry too much about spelling, since the editors will fix it.

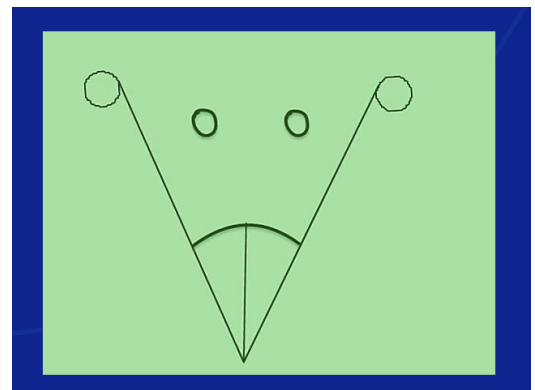

Reporters should be able to have some ability to spell or type. Preferably, the articles should be done online. Reporters are asked but not required to include a picture, maximum 2.

Before being hired, reporters will take an interview.

Here is the place you should email to be hired:

[vintro@vintros.net](mailto:vintro@vintros.net)

Thank you for your attention.

## DOCTOR APPLE : SOME FEATURES WHICH SAVE LIVES

*Apple has many life saving features: here are some.*

*Apple Health App Icon*

Apple is becoming more and more Doctor-ish. Here are just some of its features which can save lives!

Medical ID is a great feature. It allows you to keep all of your medical data in one place. For example, I just came back from the doctor, who told me to take 0.5 milliliters a day of Solmucol, and 1 milliliter a day of Sambucol, I open my Health app on my iPhone, and jot it down. You can also write your allergies there.

Emergency SOS is another feature which is great! It works on both Apple Watch and iPhone, and activates if you hold the side button down for several seconds, it will allow you to call emergency services. This feature has been critical in saving lives!

The new feature in iOS 13.5 and watchOS 6.2.5 is that it automatically sends your Medical ID to the emergency services when you call the emergency services. This helps when doctors need to know what allergies you have but you fainted right after calling.

It looks like Apple is heading toward a healthier future!
