THE U-TURN OF CHROME

Google gives millions of users a reason to keep Chrome

Chrome 81 has been released and there is a huge new feature. You can now group up tabs.

You know how annoying it is to search for that one tab, then decide to make a new one of those, and then search for another, etc.? With this new feature, you can now add tabs to groups to make it more organized. For example, I want my detective agencies in one group, so I create a group called: Detective Agencies and put in Top Layer, for example! Then in another group I want newspaper companies, so I make a group called News and put Vintro's Newspaper under there, and maybe also Google News and Apple News!

So don't click the delete button, and make a news group right away!

NOW HIRING: REPORTERS

We are still looking for reporters.

Vintro's is on the lookout for more reporters. The reporters should not worry too much about spelling, since the editors will fix it.

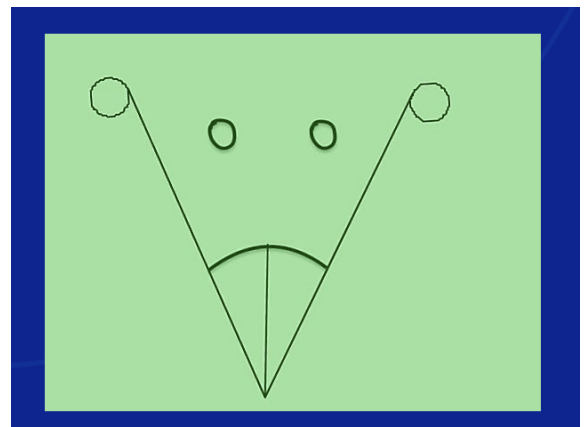

Reporters should be able to have some ability to spell or type. Preferably, the articles should be done online. Reporters are asked but not required to include a picture, maximum 2.

Before being hired, reporters will take an interview.

Here is the place you should email to be hired:

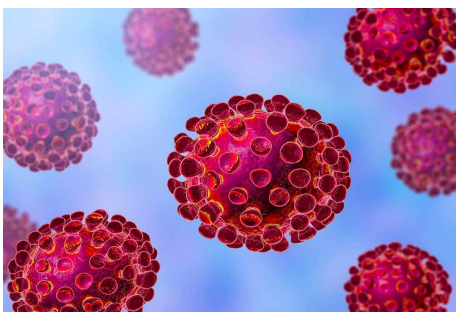

vintro@vintros.net

Thank you for your attention.

THE 13 FEET OF VIRUS

Coronavirus can travel 13 feet in the air and on shoes, CDC says.

A new study says that the COVID-19 virus can travel in the air. This is almost twice as much than the social distancing guidelines! 13 feet is 4 meters.

To make things worse, half of the soles of the patients in a hospital also tested positive, but shoes can't really suffer from having a virus on them. This is bad for us though, since shoes of medical staff can carry the virus around!

Research last month says that it can travel up to 27 feet, but only if you sneeze very, very, VERY hard, so this scenario is not practical.

So to summarize, don't touch shoes, and keep 30 feet away from others!
