## DJI CARRY DRONE

*DJI's Mavic Air 2 Can Lift A Lot More Than Its Body Weight!*

DJI's Mavic Air 2 can lift much more than its body weight.

In the COVID-19 pandemic, people in quarantine got bored. One person decided to do a drone weight lifting contest.

The people at PhotographyTalk decided at first to make 3 drones lift their body weight: the 3 drones being the Mavic Air 2, the Mavic Mini, and the Mavic 2 Pro.

The Mavic Mini had to lift 249 grams, but then could not take off. That was a failure, but there are still 2 drones!

The Mavic 2 Pro lifted 1,137 grams while weighing 907 grams. But the Mavic Air 2 lifted 1,400 grams while weighing 570 grams! We have a winner!

You can try this at home, just try not to break your drone in the process. Good Luck!

# NOW HIRING: REPORTERS

We are still looking for reporters. We have started recycling articles until we get more reporters!

Vintro's is on the lookout for more reporters. The reporters should not worry too much about spelling, since the editors will fix it.

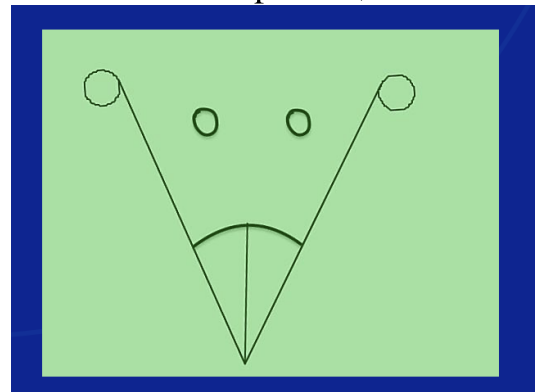

Reporters should be able to have some ability to spell or type. Preferably, the articles should be done online. Reporters are asked but not required to include a picture, maximum 2.

Before being hired, reporters will take an interview.

Here is the place you should email to be hired:

[vintro@vintros.net](mailto:vintro@vintros.net)

Thank you for your attention.

## 6 MILLION TOTAL CASES

*The Coronavirus Has Hit 6 Million Total Cases! Will It Reach 10 Million?*

Coronavirus cases have hit 6 million, according to Worldmeters.info. This means that cases are rising fast!

Will humanity turn around or no? Will there be a second wave or no?

There are still many unanswered questions about the virus. Maybe the more we learn, the more chance we have of surviving it.
